¹ 2017 reported figures have been restated applying the new revenue recognition standard, IFRS 15. See "Critical Accounting Policies and Estimates" in our Q1 2018 MD&A.

² Effective January 1, 2018 and on a retrospective basis, we realigned our reportable segments and related financial results. As a result, certain figures have been retrospectively amended. See "Reportable Segments" in our Q1 2018 MD&A.

³See "Key Performance Indicators".

⁴ Adjusted EBITDA, adjusted net income, and adjusted basic and diluted earnings per share are non-GAAP measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have standard meanings, so may not be a reliable way to compare us to other companies. These measures have been retrospectively amended to incorporate stock-based compensation when comparing to previously reported figures. See "Reportable Segments" in our Q1 2018 MD&A and "Non-GAAP Measures".

Key Performance Indicators

We measure the success of our strategy using a number of key performance indicators that are defined and discussed in our 2017 Annual MD&A and our Q1 2018 MD&A. We believe these key performance indicators allow us to appropriately measure our performance against our operating strategy as well as against the results of our peers and competitors. The following key performance indicators are not measurements in accordance with IFRS and should not be considered as an alternative to net income or any other measure of performance under IFRS. They include:

subscriber counts;

- Wireless;
- Cable;
- · homes passed (Cable);and
- subscriber churn (churn);
- blended average billings per user (ABPU);
- blended average revenue per user (ARPU);
- · capital intensity; and
- · total service revenue.

Non-GAAP Measures

We use the following non-GAAP measures. These are reviewed regularly by management and our Board of Directors in assessing our performance and making decisions regarding the ongoing operations of our business and its ability to generate cash flows. Some or all of these measures may also be used by investors, lending institutions, and credit rating agencies as indicators of our operating performance, of our ability to incur and service debt, and as measurements to value companies in the telecommunications sector. These are not recognized measures under GAAP and do not have standard meanings under IFRS, so may not be reliable ways to compare us to other companies.

| Non-GAAP measure | Why we use it | How we calculate it | Most comparable IFRS financial measure |
|--|---|---|---|
| Adjusted EBITDA Adjusted EBITDA margin | To evaluate the performance of our businesses, and when making decisions about the ongoing operations of the business and our ability to generate cash flows. We believe that certain investors and analysts use adjusted EBITDA to measure our ability to service debt and to meet other payment obligations. We also use it as one component in determining short-term incentive compensation for all management employees. | Adjusted EBITDA: Net income add (deduct) income tax expense (recovery); finance costs; depreciation and amortization; other expense (income); restructuring, acquisition and other; and loss (gain) on disposition of property, plant and equipment. Adjusted EBITDA margin: Adjusted EBITDA divided by revenue. | Net income |
| Adjusted net income Adjusted basic and diluted earnings per share | To assess the performance of our businesses before the effects of the noted items, because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. Excluding these items does not imply that they are non-recurring. | Adjusted net income: Net income add (deduct) restructuring, acquisition and other; loss (recovery) on sale or wind down of investments; loss (gain) on disposition of property, plant and equipment; (gain) on acquisitions; loss on non- controlling interest purchase obligations; loss on repayment of long-term debt; and income tax adjustments on these items, including adjustments as a result of legislative changes. Adjusted basic and diluted earnings per share: Adjusted net income divided by basic and diluted weighted average shares outstanding. | Net income Basic and diluted earnings per share |
| Free cash flow | To show how much cash we have available to repay debt and reinvest in our company, which is an important indicator of our financial strength and performance. We believe that some investors and analysts use free cash flow to value a business and its underlying assets. | Adjusted EBITDA deduct capital expenditures; interest on borrowings net of capitalized interest; net change in contract asset and deferred commission cost asset balances; and cash income taxes. | Cash provided by operating activities |
| Adjusted net debt | To conduct valuation-related analysis and make decisions about capital structure. We believe this helps investors and analysts analyze our enterprise and equity value and assess our leverage. | Total long-term debt add (deduct) current portion of long-term debt; deferred transaction costs and discounts; net debt derivative (assets) liabilities; credit risk adjustment related to net debt derivatives; bank advances (cash and cash equivalents); and short-term borrowings. | Long-term debt |
| Adjusted net debt / adjusted EBITDA (debt leverage ratio) | To conduct valuation-related analysis and make decisions about capital structure. We believe this helps investors and analysts analyze our enterprise and equity value and assess our leverage. | Adjusted net debt (defined above) divided by 12-month trailing adjusted EBITDA (defined above). | Long-term debt divided by net income |
